Conclusion

AnaPico APSIN12-PE2-FILT, APSIN20-PE2-FILT series generators are mid-range devices with slightly above average performance and a good price. In the APSIN-L generation you can get low harmonics in X-band and Ku-band, which is the main range for the defense industry and the signal generator is budget-friendly.

The advantages of the model are:

- Low phase noise 1 GHz 20 kHz detuning -130 dBn/Hz, this is better than N5173B, SMB100A
- Frequency range from 9 kHz, Rode Schwarz SMB100A only works from 100 kHz
- Good level of non-harmonics APSIN
- Max power and harmonics performance in important frequency rage

Options with no counterparts in class:

- EB6 and B3, external and internal battery operation, no mains power. Very handy in the field.
- NP - short pulse modulation with 5 ns resolution
- NEC - fast frequency conversion, modulation with 4 pulses, pulse setting resolution of 5 ns.

APSIN series generators are on average 35% cheaper than their class counterparts.

Average delivery time 4-6 weeks
